Backend Developer

Company Overview:

GoMarble is an early-stage startup with a mission to empower small and emerging brands globally by delivering high-performing digital ads through innovative, AI-assisted, human-led performance marketing. Our founders are IIT and IIM graduates and seasoned professionals who have successfully exited previous ventures and worked at marquee firms such as McKinsey and Goldman Sachs.

Key Responsibilities:

- Design, implement, and maintain highly scalable and efficient backend systems, with a focus on optimizing data pipelines for large-scale image and video processing.
- Collaborate closely with cross-functional teams, including data scientists, frontend developers, and AI specialists, to ensure seamless integration between backend systems and AI models, enabling smooth and reliable operations.
- Develop, maintain, and optimize robust APIs to facilitate seamless integration with both external services and internal platforms, ensuring high availability and performance.
- Debug and troubleshoot complex issues in backend systems, ensuring high levels of performance, security, and data integrity across all operations.
- Stay up-to-date with the latest trends and advancements in backend technologies, actively contributing to architecture and system design discussions to enhance overall system scalability, security, and performance.

Qualifications:

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- At least 1 year of hands-on experience in developing and deploying backend applications.
- Strong programming skills in Python, Node.js, or Java, with experience in building scalable web applications.
- Familiarity with databases such as MySQL, PostgreSQL, or MongoDB.
- Experience with cloud platforms like AWS, GCP, or Azure is a plus.
- Knowledge of APIs, microservices architecture, and RESTful services.
- Strong problem-solving skills and attention to detail.
- Effective communication and collaboration skills in a team environment.

Location: This is a full time position based in Bengaluru, Karnataka.

Application Instructions: Candidates who are interested, please undertake the assignment. Once finished, kindly submit it over the email as instructed in the Assignment details.
